On September 6, 2025, the State Operations Center (SOC) requested 4 Swiftwater Rescue Squads in preparation for potentially severe tropical weather. The squads were staged in Junction and Del Rio.

On September 7, 2025, some members were repositioned including WS-Killeen to Rocksprings and WGS-Schott to Del Rio. That afternoon, WS-Killeen responded to a call for service from Edwards Co EMC regarding a missing elderly female near high running water. The squads began hasty searches along the river and requested a drone team after receiving limited information from the missing subject’s husband. They located the missing person via verbal contact and completed a successful boat rescue, reuniting her with her spouse. The squads staged overnight as follows: WS-San Antonio in Robstown, WS-Fort Worth in Amarillo, WS-Killeen in Junction, WS-Austin in Del Rio, and WGS-Schott in Uvalde.

On September 8, 2025, all squads remained in place monitoring the weather conditions and maintaining preparedness. On September 9, 2025, 3 squads were demobilized including WS-Killeen, WS-Austin, and WS-San Antonio. The final squad, WS-Fort Worth remained in place awaiting any requests for service.

On September 11, 2025, with the severe weather threat leaving the state, the final water squad was demobilized. All members returned to their home stations for boat and equipment rehabilitation.
