

Deployment Statistics

Lasted a total of 3 days

38 Personnel activated supporting the following resources:

- 5 Water Rescue Squads
- TEEX High Profile Vehicles

Type - **RAIN**

On June 4, 2019, Texas Task Force One was deployed to several regions in Texas due to the severe weather including extreme wind gusts and heavy thunderstorms reaching to Matagorda Bay. TDEM activated five Water Rescue Squads, one Water Group Supervisor, one Support Specialist, and the TEEX High Profile Vehicles to stage in Austin, Galveston, Beaumont, Brownsville, and Sealy to assist the locals with possible flash flooding.

On June 6, all resources were demobilized after the threat of storms left the state. During this deployment the teams coordinated reconnaissance missions, welfare checks, and served as backup for local responders.
