

## Deployment Statistics

Lasted a total of 3 days

26 Personnel activated supporting the following resources:

- 4 Water Rescue Squads

Type - **RAIN**

On December 30, 2020, the Texas Division of Emergency Management activated Texas A&M Task Force 1 to prepare for possible flash flooding and severe weather across the state of Texas. The team activated 4 Water Rescue Squads with one Water Group Supervisor and 1 support Specialist. The teams were staged in Regions 2, 4, and 6.

On December 31, 2020, consistent and heavy rain covered the eastern half of Texas causing minor flooding in some areas. TX-TF 1 resources did reconnaissance of the known low-lying areas.

On January 1, 2021, after no further requests for service, all resources were deactivated and returned to their home stations.
